CDG-CONSTRUCTION LIMITED – Environmental Policy Statement

CDG-CONSTRUCTION LIMITED is committed to protecting and enhancing the environment. This is a fundamental principle of the Company's business. We believe that the Company should make every appropriate effort to avoid compromising future generations' ability to sustain their needs.

The Company seeks to comply with all relevant environmental legislation and regulations. Particular attention will be paid to actions to reduce use of materials and energy, increase recycling and to minimize emissions and wastes to air, water and soil.

Management will strive to continually improve its environmental performance and update operational practices in the light of technological advances and new understandings in environmental science. It is the responsibility of every employee to observe this policy, and the related guidelines and to protect and preserve the environment.

Management and employees are committed to minimizing these effects by effective use of procedures within our Business Management System. These targets will be revised in order to achieve our principal business goal of continuous improvement.
